

AQUAGLOW™

Aqua Therapy System

Advanced aqua therapy device designed to enhance skin exfoliation by removing dead skin cells and excess sebum while providing hydration. Its unique tip features two suctions and one serum discharge, with a spiral design for optimal skin contact. With its powerful vacuum function, AquaGLOW™ ensures a deep cleanse and extraction for a refreshed, radiant complexion.

Key Advantages

Advanced Aqua Therapy

Simultaneously eliminates aged dead skin cells, removes excess sebum, and delivers hydration for refreshed, healthy skin.

Innovative Tip Design

Features a unique spiral design with two suctions and one serum discharge to maximize skin contact and effectively soften dead skin cells.

Enhanced Exfoliation with Vacuum Function

Amplifies peeling and extrusion effects for deeper exfoliation and clearer skin.

Versatile Handpieces

Includes Diamond, Hydrofacial, Ultrasound, and Radiofrequency handpieces to address a variety of skin care needs.

Elevate Your Glow

Deep Cleanse, Hydrate, and Radiate with AquaGLOW™

Aqua Therapy System

Advanced aqua therapy device that deeply cleanses, exfoliates, and hydrates the skin. Its unique spiral tip with dual suction and serum infusion ensures optimal contact, removing dead skin cells and excess sebum for a refreshed, radiant complexion.

- Seal and shake before use

4 HANDPIECES

Each handpiece is designed to target a specific skin goal, allowing you to combine them for customizable, full-spectrum treatments.

WHY AQUAGLOW?

Advanced Aqua Therapy

Simultaneously eliminates aged dead skin cells, removes excess sebum, and delivers hydration for refreshed, healthy skin.

Dual Aquafacial Handpieces

Designed to target both wide facial areas and narrower zones like the nose for precise, customizable treatment.

Spiral Vacuum Tip for Precise Exfoliation

Features a unique spiral design with two suctions and one serum discharge to maximize skin contact and effectively soften dead skin cells.

Enhanced Exfoliation with Vacuum Function

Helps dislodge impurities and surface buildup.
