

Introducing Our New Sexual Health Product

BREMELANOTIDE (PT-141)

A breakthrough treatment for men and women

Is Bremelanotide (PT-141) For Me?

Have you experienced any of the following symptoms on a regular basis? You could be a candidate for peptide PT-141.

- Diminished sex drive
- Lack of ability to become aroused
- Painful intercourse
- Difficulty achieving orgasm
- Embarrassment, shame, or anxiety especially related to a reduced interest in sex?

What Are Peptides?

Peptides are short-chain amino acids and are the building blocks of protein in the body. Peptides augment specific functions within the human body. Peptide therapy is a way to reduce the symptoms and discomfort associated with decreased amino acid production. In addition to balancing Human Growth Hormone levels, peptide therapy also addresses a wide variety of conditions. Treatment plans can optimize your body composition, sexual health, and overall well-being.

What Are the Benefits of the PT-141 Peptide Hormone?

- Improved sexual desire and performance
- Renewed confidence and self-esteem
- Strengthen bonds with your partner
- Sexual intercourse free from pain or discomfort
- Better, healthier sex which enhances mood, decreases stress, and reduces depression
- You could experience even more benefits when combined with other treatments and hormone therapies
